### The Tuckunder Series: TKT Models. Liftgate Function.

The Tuckunder Series has been designed to maximize efficiency of operation and user convenience. Dual cylinders are applied to the platform to ensure a robust, dependable lift. The platform has a hydraulic "power down" function that provides consistent motion, both up and down, in all weather climates. And, the self-leveling action allows the platform to travel level from the height of the bed extension until the liftgate arm "knuckle" touches ground.

ground level

knuckle

1. Platform is level at bed extension height.

2. Platform is level at mid-travel.

3. Platform is level when "knuckle" hits ground.

4. A secondary hydraulic function rolls the platform edge to load level.

### State-of-the-art Design. Tons of Features.

Power-Down

Dual-Cylinder

Self-Leveling

Wedge Platform

TKT Models are comprised of a wide-arm, dual cylinder design and power down function that provide sturdy platform lifting action and quick, dependable platform deployment. Self-leveling, wedge-style platforms also allow for easy loading and unloading.
